## NOTES FOR THE SIXTH MEETING OF TASK TEAM IV - INSTALLATIONS -

1. As sual, our first order of business is to consider the minutes of our meeting of 18 January 1965, ably prepared by our Secretary, Mr.

gave us a preliminary report 2. At our last meeting, Mr. regarding a "both sides" paper on the two different systems currently in use for the designation of missile sites, for consideration by our paper has received coordination now Task Team. If Mr. within NPIC, I believe that it would be appropriate to discuss it at this time. This matter has been under active consideration within DIA and I am happy to be able to report to you that a DIA position has now been reached, calling for modification of the designation of the present DIA system for R&D sites to the place name/alphabetic designator (as employed by NPIC), the recention of the place name/ numerical designation for operational sites, and the decision by DIA to solicit the concurrence of both GMAIC and NPIC to adopt and implement such a compromise system as a single, uniform system throughout the intelligence community. This information on activity on the part of DIA is submitted to the Task Team for their information, as a fact bearing on the problem, as we consider Mr. "both sides" paper. I am happy to report that I have found convincing evidence on the part of all concerned of a strong desire for the adoption and establishment of a single uniform system to be followed by the entire intelligence community.

3. At our last meeting, there was considerable discussion of a category code or codes, with support expressed for the endorsement of the functional classification code contained in DIAM 65-3-1 as applicable to the categorization of target-type installations. Mention was also made of the various categorization systems involved in classifying electronic emitters. I would like to call your attention to a current "Plan for Management of World-Wide Production of Electronic Order of Battle," 7 December 1964, which has been forwarded by the Joint Chiefs of Staff to all Unified and Specified Commands for coordination. I will keep the Task Team informed of action in this field. I enclose a copy of the codification under consideration for your perusal.

4. About commencing the writing of our Task Team's report: Do we have any volunteers for turning out drafts of various portions of the report? Perhaps our Secretary will favor us by jotting down immediately the names of the individuals competing for taking on responsibility for various portions of a draft report.

25X1A

Chairman
